

Astra Cyber Program for Schools

We focus on cyber risks so you can focus on education.

Just as no two schools are alike, no two cyber insurance policies are alike. Some aren't even tailored to the needs of schools.

Astra's cyber policy for schools fills critical gaps left by others, covering unique e-crime losses and offering fast, expert-led incident response. We help schools manage cyber events, reduce regulatory risk, support staff, and control post-incident costs. With a tailored proposal, an intuitive response portal, and guidance on the right coverage and limits, we make it easy to protect your school and present confidently to boards and stakeholders.
