

Software Solutions to Keep Your Fleet Moving

Insurance doesn't have to be complicated. Let us lighten your load by offering you access to efficient tools and resources that make life easy; allowing you to stay nimble and focused on keeping trucks on the road.

APPLIED CSR24

CSR24 is a 24/7 customer service platform that provides access to your insurance information where and when you need it. You can view policy information, generate and obtain insurance forms (e.g., certificates, auto IDs), and request changes, including adding coverage, vehicles and drivers.

FLEET MANAGEMENT SYSTEM

Tracking the critical components in fleet management is essential to minimizing risk and improving efficiency. Hylant's fleet management software is a simple inventory solution to track drivers, vehicles and equipment. This software solution allows you to stay organized and manage your fleets effectively.

HYLANT RISK MANAGEMENT CENTER

Help protect your company with the Hylant Risk Management Center, a unique web-based software suite of safety and risk management tools that empowers your organization's risk prevention efforts. Our comprehensive safety library offers training courses like defensive driver training, hours of service violation reduction, distracted driving, etc. These courses help mitigate risk, reduce loss and enhance your current safety and compliance program.

HYTRACK

Protect your organization against the risk of underinsured claims, failed audits and costly lawsuits with HyTrack, a web-based tracking and monitoring system for certificates of insurance. Created specifically for Hylant clients, this flexible solution provides a single place to view and manage certificates of insurance and is easily customizable to help your organization quickly identify areas of risk, flag critical entities for review or escalate problems to appropriate individuals.

Contact our transportation experts to find out how partnering with us helps you lower your total cost of risk and build your business success.
